## **DETAILED ACTION**

### ***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance: Gross et. al. (OPTICS COMMUNICATION ARTICLE) teaches the use of an optical device which uses a non-linear Kerr effect in propagating femtosecond pulses in optical planar waveguides. Gross et. al. does not teach or suggest the claimed non-linear optical device, method of enhancing bandwidth, parametric oscillator and parametric amplifier that enhances bandwidth using the ratio of accessible bandwidth to the input bandwidth being at least 4 with the spectral radiant intensity remains below a level of -30 decibels (0.001) of the maximum value. These limitations are recited in claims 1-46 which are considered to be patentable over the teachings of Gross et. al. and all of the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
